

A research team from the National University of Singapore (NUS), INSEAD, and the Nanyang Technological University (NTU) is jointly looking for candidates for a *Distinguished Post-Doctoral Fellowship Award on Business and Society*, with a specialized focus on behavioral transportation research.

Urban transportation is an emerging and exciting topic that draws attention from researchers in multiple disciplines. Singapore's unique urban environment and institutional features put it at the forefront of innovative public policy research on transportation. The current research team comprises professors in Economics, Psychology, and Business, and works in close consultation with various government agencies.

The initial term of the fellowship is one year, extendable to up to two more years subject to mutual interests. The fellowship offers access to world-class faculties at the three universities, unique data sources, opportunities to conduct large-scale field experiments, and competitive employment terms. The awardee will be based

in Singapore. Together with the research team, the awardee is expected to deliver high quality research, in the form of top journal publications, which impacts public policies. The fellowship can serve as an excellent launchpad for the awardee's future placement to a tenure-track position at a leading business school.

The ideal candidate should have or be in near completion of a doctoral degree in Economics, Psychology, or Business. He or she should have expertise in quantitative research, demonstrate independence and resourcefulness, and be proficient in managing large-scale research projects.

Interested candidates should send an application letter, CV, and a writing sample, and arrange for three recommendation letters to be sent to [bizmaia@nus.edu.sg](mailto:bizmaia@nus.edu.sg). Applications will be evaluated on a rolling basis until the fellowship is awarded.
